

global relay Email & Collaboration Suite

SECURE HOSTED EMAIL SYSTEM: YOUR CRITICAL BUSINESS TOOL

Offered as an alternative to in-house email servers or Hosted Exchange, Global Relay's Hosted Email system & Collaboration Suite is engineered to provide an enterprise-class email service to companies of any size.

Key Features

Email, Contacts, Calendar, Documents, File Sharing, Tasks, Apps & Synchronization to other desktops and devices

Storage

10GB of storage per mailbox for every user, with the ability to upgrade

Security

Includes Global Relay's Hosted Email Filtering for virus & spam gateway protection

Access

Your email anywhere/anytime via an AJAX-based web mail, Zimbra desktop or on any mobile device with an HTML capable mobile web browser

Branding

Email addresses branded with your domain: mary.smith@yourdomain.com and ability to custom brand the Zimbra web interface

Share and Collaborate

any application with peers: inboxes, contacts, calendars, documents and tasks

Attachment

Send/receive attachments up to 100 MB

Fully Managed Service

Hosted Deployment with no hardware or software required. Your monthly fee per user includes premium 24x7 support, security, maintenance, upgrades and a highly-available infrastructure hosted in SAS 70 Type II certified data centers

Never Lose Email Again

Seamlessly integrate with the Message Archiver, ensuring you will never lose email again. With unlimited mailbox storage capacity, it is the fastest and most efficient method of finding and managing email. All incoming, internal and outgoing email is captured by the Message Archiver in real time, with secure end-to-end encryption

In-House vs. Hosted

In-House

In-house email solutions can have significant initial and ongoing expenses requiring hardware deployment, servers, backup and network provisioning. They also require the necessary IT personnel to deploy and maintain the solution as well as monitor, patch, scale and upgrade.

In-House Solutions Can Require

- Installation and maintenance
- Capital investment into on-premise infrastructure
- An IT support team
- Ongoing maintenance and upgrade expenses

VS

Hosted

Global Relay's Hosted Email System provides infrastructure, support, training and email access from anywhere in the world, taking the burden off your IT department. The hosted email system removes the need for your organization to purchase, install, maintain and trouble-shoot an in-house mail server.

Global Relay's Hosted Email Requires

- No overhead
- No special equipment
- No programming
- No capital outlays

Global Relay Hosted Email System delivers high availability anytime, anywhere for any type of business, large or small.

Features

Web Client

- Rich browser-based AJAX interface with application-like features such as drag and drop, tagging and conversation views
- Comprehensive search, including within attachments, and saved search folders

Advanced web-based calendar

- Manage multiple calendars
- Enterprise calendars with free/busy lookup, resources and rooms
- Easy sharing and full delegation
- Interoperable with Microsoft Exchange 2003/2007

Share and Collaborate

- Share and manage inboxes, Contacts, Calendars, Files, Tasks, Documents and Folders
- Create shared wiki documents and manage files from a single Briefcase document repository
- Sharing and role management
- Publish publicly or to internal groups

Enterprise Mash-ups

- Web-services connectors that enable integration of 3rd party apps
- Increase productivity & save time by managing common tasks within the interface rather than opening multiple apps

Desktops

- MAPI synchronization to Outlook 2003/2007 with full delegate and offline access
- Supports both Online and Offline modes
- Sync optimized for fastest performance
- Native synchronization to Apple desktop applications
- Support for all POP3 / IMAP4 Clients

Mobile

- Native "over-the-air" synchronization to iPhone, Windows, Palm, and Symbian OS Smartphones
- Set mobile security policies including device wipe, PINs and device management features on user accounts

- Rich browser-based experience for email, contacts, calendar and files on any XHTML capable device
- Easy device configuration
