

global relay search for iPhone

MOBILE MESSAGE ARCHIVE SEARCH

Access your Message Archive on the iPhone

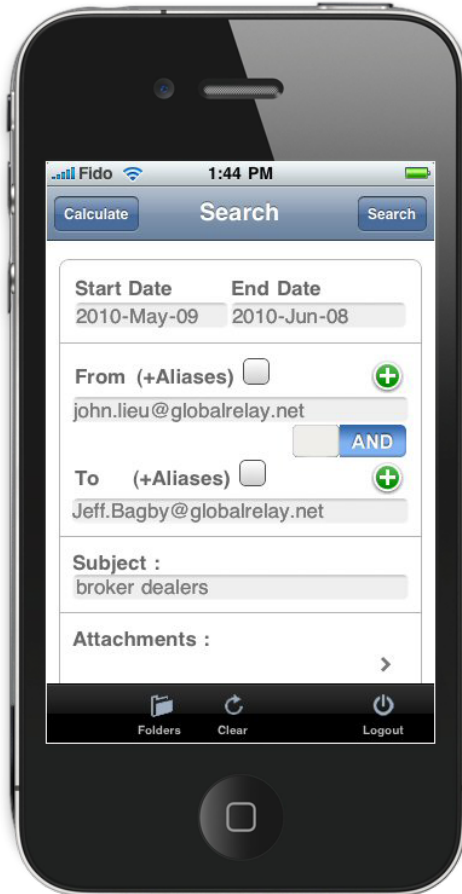

Retrieve any message on the go. As an integrated part of Global Relay Archive, this innovative iPhone app provides quick mobile access to all archived message types, including email attachments, IM, Bloomberg, BlackBerry, Thomson Reuters, Social Networks (LinkedIn, Facebook, Twitter) and more. Global Relay Search for iPhone is available in the App Store.

Fast and powerful search tools. At the core of Global Relay Search for iPhone is Global Relay's proprietary indexing technology – allowing users to rapidly search, reply, reply all, forward, and recover across every type of message. Advanced search functionality such as Boolean, wildcard, phrase and proximity searches ensures quick, accurate search results.

Benefit from an unlimited mailbox. Global Relay Search for iPhone gives users access to an unlimited personal mailbox, allowing easy retrieval of any historical message – regardless of message size or date.

Designed for Compliance

Ensure regulatory compliance. Global Relay Search for iPhone is an integrated component of Global Relay Archive. The system works to capture, serialize, index and preserve your firm's messages to meet the compliance requirements of firms in highly regulated industries. With more than 12 years experience, Global Relay is the expert in Compliance Messaging Solutions, including Compliance

Archiving, eDiscovery, Mobile Messaging and Collaboration. Our dedicated in-house legal, audit and eDiscovery teams are always available to guide customers through audits, eDiscovery requests and legal proceedings.
