

SUPERVISION FOR YOUR HYBRID WORKPLACE

EFFECTIVELY SUPERVISE & REGULATE EMPLOYEE COMMUNICATIONS

Workplace incidents involving bullying, discrimination, data leaks, and intellectual property theft are on the rise. If your organization communicates using email, IM, enterprise collaboration, and other electronic platforms, it could be facing not only issues with fragmented storage systems, but also blind spots on employee misconduct.

Ignored for too long, this can escalate into costly litigation, reputational damage, and other severe consequences. Your organization needs to have tight control over what's said and shared over its communication channels. Global Relay Archive provides the essential tools to capture, preserve, and supervise all its eComms data, and to detect and address violations on time.

COMPREHENSIVE ARCHIVING

Capture and store 100 data types – including email, social media, text, IM, and enterprise collaboration – in a secure, unified, and tamperproof cloud.

SINGLE SOURCE OF TRUTH

Maintain a single source of truth for all your communications data, which indisputably establishes 'who said what, when, to whom.'

POLICY-BASED SUPERVISION

Scan all your communications data against configured policies to monitor for compliance with corporate policies and to manage violations promptly.

ADVANCED SEARCH ANALYTICS

Drill down to relevant communications, examine messages within their original, meaningful context, and piece together events using AI-enabled tools.

RELATIONSHIP MAPPING

Learn more about conversation participants by uncovering their underlying business connections, group memberships, and social networks.

DATA VISUALIZATION

Analyze valuable supplemental data – such as top message senders/recipients, communication channels used, topic patterns and trends – through timelines, graphs, and charts.

eDISCOVERY & LEGAL HOLD

Run rapid, highly granular eDiscovery searches, and place defensible legal holds on potentially responsive data when you anticipate litigation.

EFFECTIVE CASE MANAGEMENT

Efficiently segregate, classify, share, and review data relevant to audits, investigations, and litigation.
