

# Compliance without compromise

We've built a rock-solid foundation for compliant communications, from the Global Relay App through to intelligent archiving, connecting everything in between.

# Global Relay Archive

**Fully compliant, scalable cloud archive**

Enrich, store, and manage all communication data in a powerful cloud archive, with search, workspaces, and workflows so you can work smarter.

## **Data archiving at scale**

Support for 100+ data types, including email, collaboration, voice, and more – regardless of volume or headcount

## **Integrated, configurable workflows**

Secure, “ring-fenced” function-specific workgroups for surveillance, eDiscovery, and compliance

## **AI-enabled**

Powerful data classification seamlessly integrating AI, machine learning, and lexicon-based tools

## **Class-leading information security**

SOC2-audited data centers, ISO27001 accreditation, 24/7 data center monitoring, and military-grade encryption

## **Quality, accuracy & completeness**

Assured recordkeeping and retrieval through constant integrity checks

# Global Relay Connectors

Any data type, wherever you need it

Our ever-expanding range of connectors help you collect, store, access, and use your data to drive better business outcomes.

# Global Relay Surveillance

**Proactively supervise your business communications, all in one system**

With the proliferation of business communication channels, it's increasingly difficult to manage your electronic communications, voice, trade data, and files.

## **Spot it.**

Intelligently flag high-risk content, using a mix of AI models, lexicons, message metadata, and participants.

## **Review it.**

Automatically route policy hits to the right people. Support your reviewers with tools to quickly understand context, identify patterns, take action, and document their work.

## **Prove it.**

Log every step of the supervision process for complete visibility and oversight by giving reviewers and their managers real-time visualizations of the review workflow, policy hits, and frequent offenders.
